Anger, Scott

Mon 1/8/2018 6:03

To: Bracamontes, Rolando <RBracam@lasd.org>;

Yes, we have been collecting these stats for 18 months now, it allows us to use their (FBI) free encryption unlock service for certain crimes and certain phones.

Gentlemen,

Firstly, Happy New Year!

I have been asked by my division to inquire on whether or not FCCB might already be involved in the FBI's "Going Dark" statistical collection program (refer to the attached spreadsheet) or if you are even remotely aware of it.

If this effort is appropriate and worthwhile, its entirely possible that the Sheriff would want to work with the FBI in this effort. That having been said, this would have to be coordinated with the rest of Detective Division and, to a certain extend, patrol divisions since other bureaus have mobile data extraction tools.

Anyway, do you guys have any thoughts or input?

RB

## MCCA Intelligence Commanders:

Happy New Year! Below was our first email sent out by the FBI in coordination with MCCA Executive Director Richard Myers focusing efforts on the Going Dark Data Collection effort as we move into 2018. Please take a moment to review our joint release we sent out if you have not already done so as the MCCA has identified each of you as the best point of contact for this collection effort. If you have already reviewed this information, this serves as a monthly reminder to submit data on behalf of your agency and the MCCA. We are looking forward to receiving information from all of you monthly in order to best define the Going Dark problem and allow the FBI and MCCA to best use this information with legislative and policy makers.

## MCCA Intelligence Commanders:

The FBI in coordination with MCCA Executive Director Richard Myers are providing you a short summary of the FBI/MCCA Going Dark Data Collection effort. No later than the first of each month, we will be sending you an email reminder to complete the attached spreadsheet and submit it to the NDCAC no later than the 15th of each month. We will then provide each of you a summary report of all MCCA participation the first week of the following month.

## Statistics Collection Tool - Helping Tell Law Enforcement's Story of Going Dark

Law enforcement needs evidence to make a case, but advancements in communications services and technologies, otherwise referred to as "Going Dark," are increasingly hampering their ability to collect evidence. Law enforcement is often called upon to describe the nature and scope of the impact of advanced communications technologies. In response to this growing issue, several individual agencies, prosecutor offices, and law enforcement associations worked with the National Domestic Communications Assistance Center (NDCAC) to develop a Statistics Collection Tool to better quantify the full impact of advanced communications methods on investigations and cases. The statistics and examples collected by the Tool will be shared with the law enforcement community to use when discussing the loss of access to digital evidence with policymakers and legislators. Various types of

2/20/2018

RE: MCCA Data Collection - Bracamontes, Rolando

information can be submitted with the Statistical Collection Tool, such as the story behind how the inability to collect evidence impacted an investigation, which puts the impact into context and shows real-life implications of the lack of access to evidence. For more information about the Statistics Collection Tool contact the NDCAC Technical Resource Group at (855) 306-3222 and to start using the tool, please review the attachment which can be completed and submitted to the NDCAC via email at [AskNDCAC@IC.FBI.GOV](mailto:AskNDCAC@IC.FBI.GOV).

To: Stedman, John C. <JCStedma@lasd.org>;

Cc: Gatiglio, Cynthia <cgatigl@lasd.org>;

Sir, based on the response below, it appears that FCCB has already been doing this over the previous year.

So, when other bureaus cannot get into devices due to employment of advanced security measures, those devices are sent to FCCB and are included in the "Going Dark" statistics statistical collection.

Does this answer your questions?

RB

Brac,

Thanks for reaching out. Hope you're well.

We submit our numbers to NDCAC on a monthly basis. We have been doing so since last year. We also keep internal stats. Scott has been the lead on this.

Last year we participated on an IACP Panel on the subject and started reporting our stats.

We gather stats as devices are submitted to FCCB. We may be missing a few from Patrol. For other bureaus with extraction devices, generally, they have been coming to HTC when they can't get into the device. We record the stat at that time.

Tony
